FACILITIES SOLUTION PROVIDER

# ENDURA-DOR BY CONCEPT

SOLUTIONS FOR YOUR MEDICAL ENVIRONMENTS

## High Quality Specialist Glass Reinforced Polyester Door Systems

Designed for applications in Laboratories, Pharmaceutical, Surgery Rooms, Hospitals...

The Smooth and Easy to Clean surfaces of ENDURA-DOR will not harbor dirt or bacteria which are transmitted by touch or by airborne particles. The non-porous smooth gelcoat surfaces can also withstand the strongest disinfectants and cleaning agents.

Comes including full stainless steel frames or aluminium frames. Continual testing and development ensures these doors remain at the leading edge of their class.

### No more Water Damage

**These products will not rot, rust, swell or warp!**

The pressure molded encapsulated sandwich structure of these ENDURA-DOR products provide assurance doors will stay unaffected by continuous water and moisture. Doors are free of Timber or other organic materials that promote bacterial growth

*# Extended 25 year guarantee against water and moisture in normal usage*

### Resolve Your Hygienic Concerns

**High Chemical Resistance – Hygienic Products**

The Non-porous surfaces of these ENDURA-DOR Doors make them extremely easy to clean.

Excellent high resistance to most detergents, solvents and other strong chemicals.

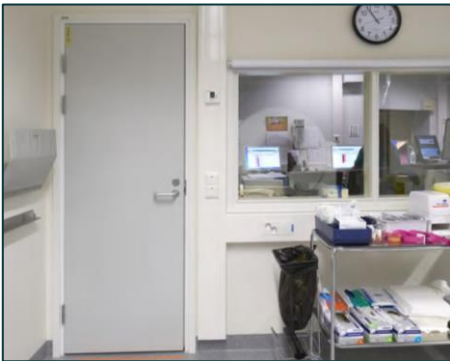

### Stop Corrosion Worries

**Corrosion Free Doors**

ENDURA-DOR by Concept Products will not rust.

The excellent surface material of glass reinforced polyester will tolerate tough operational conditions

## Lighter and Safer

### Lightweight and Safe to Use

Concept Products ENDURA-DOR weight ca. 9kg/m<sup>2</sup> – this is less than half compared to a conventional door. The light nature makes these doors safe and easy to use – even with large sizes!

These Doors also hold many Fire Safety approvals and certificates worldwide.

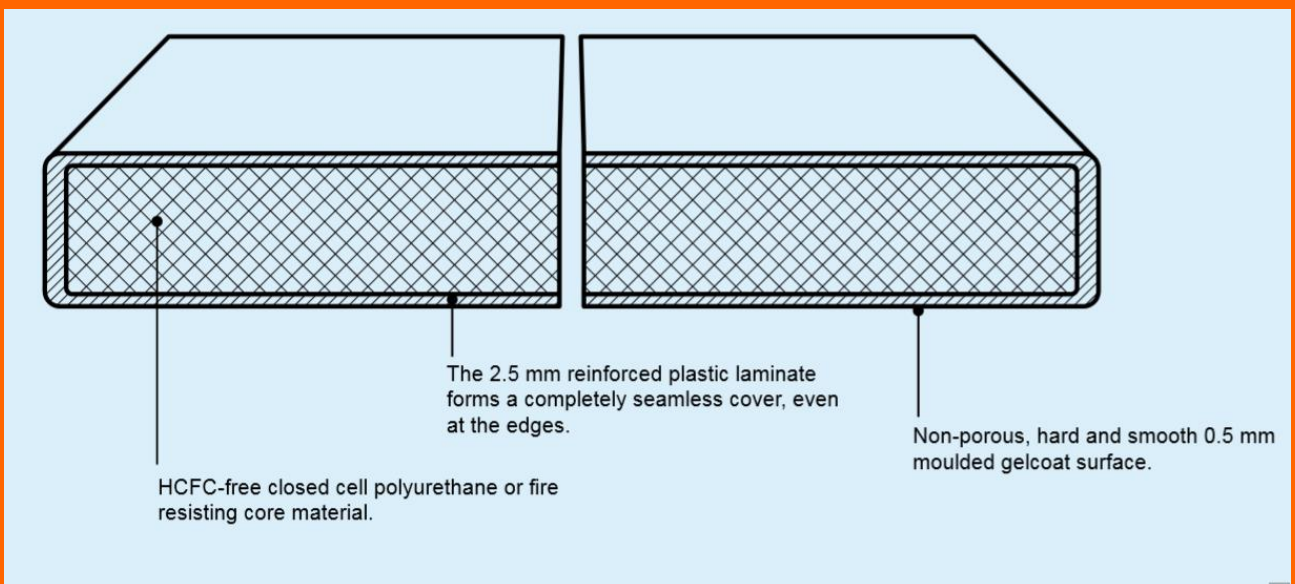

## Simplicity

### Easy to Install with Multiple Solutions

A wide range of frame systems available to suit various wall constructions and jamb conditions – all frames compliment the features and benefits of the door; hygiene, durability and aesthetics.

## Cross Section of Pressure Moulded Glass Reinforced Polyester Door

ENDURA-DOR is manufactured using a pressure molding process, this process produces a door leaf that is completely seamless and has no joints or lipping.
